

Construction and Engineering

Building your future

What they say

"Satisfied clients are quick to sing the praises of this quality outfit: 'It is practical, realistic and gives us the right advice - we can't think of any room for improvement!'"

Construction - Chambers UK, 2009

The team

Our team consists of specialist construction lawyers, well-known and recognised by the directories for their ability, enthusiasm, and commitment. In addition to the team's solicitors, we also have dual qualified barristers, an accredited construction adjudicator, and a chartered engineer.

Who we work with

We work with developers, contractors, and construction professionals in the commercial, education, transport, and private sectors. We also work with local government and other public sector and not-for-profit organisations.

Construction and engineering law has seen rapid development in the last ten years.

Whether you are a client, contractor, funder or consultant, having good advice from specialist construction and engineering lawyers has never been more important in terms of risk management and dispute avoidance and resolution.

In an industry which can be complex and liable to give rise to disputes, our large team of specialist construction and engineering lawyers can help you reduce your risk, and offer strategic, long-term advice - from the earliest stages of procurement strategy and planning, through to resolution of major and complex disputes.

Supporting the building industry

The Construction and Engineering team at Charles Russell has worked on some of the largest construction and engineering projects in the UK, including major transport schemes and large commercial and residential developments.

But for every development we advise on – and whatever its size – our aim is always the same: to ensure your project comes in on time, on budget, and to specification.

Whatever your need for construction and engineering law services, we can offer practical, commercial and value for money legal advice regarding all aspects of your project.

Our construction and engineering services include:

Procurement, risk management & contracts:

- Advice on procurement options
- Advice on EU procurement compliance
- Construction and engineering contract documentation, including amendments to standard forms contracts
- Consultant appointments
- Warranties, bonds and guarantees
- Advice on insolvency in the construction sector

Dispute resolution:

- Adjudication (statutory and contractual)
- Alternative dispute resolution, including mediation, expert determination etc
- Arbitration (domestic and international)
- Litigation generally, and in particular in the Technology and Construction Court
- Bringing and defending professional negligence claims against all types of construction professionals
- Expert determination
- Private client and construction disputes
