

Energy and Natural Resources

Meeting the demands of a challenging market

What they say

“Described by peers as ‘wholeheartedly dedicated to the mining industry’.”

Projects and Energy: Mining - Chambers UK, 2009

Our expertise

- Oil & gas
 - Energy and renewables
 - Mining
 - Utilities
-

Mineral extraction, energy, and power are highly-regulated sectors requiring specialist knowledge. Transactions and projects in these sectors are complex. Specific industry knowledge is critical. As is international expertise. And corporate finance and commercial skills are absolutely essential.

Offering an integrated service

Which is why our Energy and Natural Resources team includes specialists in corporate finance, mergers and acquisitions, dispute resolution, tax, and competition law. And this multi-disciplinary approach means we can always assemble a team of experts, with the right skills set for your transaction.

Our lawyers also have extensive international experience, having completed transactions in Australasia, Africa, the Middle East and South America as well as advising on commercial and regulatory issues in the UK for clients incorporated elsewhere.

Whatever the nature of your project or transaction, or wherever you are based in the world, when you work with our Energy and Natural Resources team you will work with dedicated professionals committed to achieving the best commercial results.

Our expertise includes:

Oil & gas

- Upstream oil and gas: onshore and offshore licensing, the full range of joint venture agreements, pipelines and transportation, mergers and acquisitions
- Private placements and IPO's
- Field development projects
