

Technology

Keeping you ahead of the game in a fast paced industry

Technology is rapidly developing sector. With new technologies coming into the market place on a monthly basis getting the right legal team onboard could be critical to the success of your business.

It is essential you work with lawyers who are not only experts in IT law but who also have technical expertise and a sound commercial understanding of the industry.

Meeting the challenges of the IT industry

The Technology team at Charles Russell offers just that. We are up-to-date with the challenges facing the IT industry. And our highly-qualified team of lawyers has relevant first-hand industry experience. This means we can offer clear, practical advice from a commercial perspective as well as a legal perspective.

We work with organisations of all sizes from major outsource providers to niche start-up software developers. We conduct arbitration and mediation for our IT clients when needed. And we work alongside other specialists in the firm including intellectual property, communications and media entertainment lawyers.

The team also includes a number of highly regarded data protection and information law specialists.

Our services include:

- Large-scale managed services agreements and outsourcing
- Contracts for suppliers and customers
- E-commerce issues, including online gambling and gaming sites
- Software development, licensing and distribution deals
- All infrastructure matters, including property rights
- Data protection and Information law
- Licensing, competition and regulatory issues
- Mergers and acquisitions, financings and securities transactions
- Joint ventures and strategic alliances
